

2023 AOTS Management training in Japan [VNAI]

This program is subsidized by Japanese government

Training program for VIETNAM The Program on Problem Solving through **AI&IoT**

28-Feb. ~ 12-Mar. 2024

@AOTS Tokyo Kenshu Center, Tokyo Japan

Course Director

Mr. Mitsuru ABE

Representative Director

AI&IoT Promotions
Association (AIPA), Japan

Highlights

- ✓ The lecturer, who has been involved in supporting the business innovation of more than 1,000 Japanese SMEs through AI&IoT, will show you the tips on how to **cost-effectively adopt AI&IoT** to address the challenges of **digital transformation (DX)** in your workplace.
- ✓ Through **company visits and lectures**, you will hear firsthand from Japanese SME executives and learn their **mindset for success**.
- ✓ Through a **hands-on technical exercise** with an **IoT sensor and AI modules**, you will experience the process of collecting and analyzing data.
- ✓ With the guidance of the instructor, you will **analyze your business problems and develop a plan for solving them** to drive **digital transformation (DX)** in your organization.

About Tokyo Kenshu Center, Training Location and Accommodation - Home Away from Home -

Strategically located in the quaint Kita-senju area of Tokyo, the TKC first opened its doors in April 1982. The training centers provide training facilities and accommodations for trainees who are away from their countries to participate in training courses at AOTS and specialized technical training at host companies. Our training center has a role to be a **"Home Away from Home"** for the trainees during their stay in Japan, in order to reduce the cultural gap and provide comfortable circumstances. For example, at the training center canteens, menu for vegetarians and Muslims are available every day. Various menu of trainees' home countries are also prepared. The reception desks deal with inquiries from trainees for 24 hours. The training centers support welfare of trainees by providing regular health consultations as well.
