About **Kansai Kenshu Center**, Training Location and Accommodation *- Home Away from Home -*

The KKC began operating in June 1994 (moved to the current location and expanded). It is easy to travel between the center and Kansai International Airport and the historical cities of Nara, Kyoto, and Kobe. The training centers provide training facilities and accommodations for trainees who are away from their countries to participate in training courses at AOTS and specialized technical training at host companies. Our training center has a role to be a **“Home Away from Home”** for the trainees during their stay in Japan, in order to reduce the cultural gap and provide comfortable circumstances. For example, at the training center canteens, menu for vegetarians and Muslims are available every day. Various menu of trainees' home countries are also prepared. The reception desks deal with inquiries from trainees for 24 hours. The training centers support welfare of trainees by providing regular health consultations as well.
